Summary

A passionate Frontend Developer with over 1 years of experience building modern and scalable web applications using React, TypeScript, and Modern Frontend Frameworks. Experienced in developing interactive user interfaces and AI-powered web products with a focus on performance, usability, and clean architecture. Continuously learning emerging technologies with a growing interest in Machine Learning and AI-driven systems. A collaborative problem solver who enjoys working with cross functional teams to deliver reliable and impactful digital products.

Education

State Polytechnic of Malang

Bachelor of Computer Science | Minor Frontend Development

Expected Graduation: Jul 2027

Malang, Indonesia

Shenyang Aerospace University

Bachelor of Computer Science | Minor Frontend Development

Expected Graduation: Jul 2027

Shenyang, China

Work Experience

Purple Box AI

Nov 2025 - January 2026

Front-end Developer Intern

Rome, Italy

- Built a production-ready AI chatbot widget plugin integrated into **Shopify and WordPress stores**, enabling automated customer support and reducing response time by **40%**
- Architected a scalable frontend using **Next.js, Radix UI, Zustand**, and **TanStack Query**, reducing unnecessary re-renders and improving UI responsiveness by **30%**
- Designed and implemented **Cypress E2E tests covering 80% of critical user flows**, reducing production bugs by **25%**
- Built automated **CI/CD pipelines using GitHub Actions**, reducing deployment time from manual releases (20 minutes) to **fully automated deployments under 3 minutes**
- Integrated the plugin across **multiple e-commerce storefronts**, enabling scalable AI-powered customer interaction modules

Projects

Neurofit | Website | Source Code

Next.js | Convex | Vapi

- Developed an **AI-powered fitness recommendation platform** delivering personalized workout plans and voice-based coaching for **20+ early users**
- Integrated **Vapi Voice AI** to enable real-time conversational workout guidance and posture analysis, improving engagement and session duration
- Built a scalable **Next.js + Convex** architecture enabling real-time data synchronization and low-latency updates
- Implemented automated CI/CD pipelines with **GitHub Actions** and deployed on **Vercel** with preview environments

Resumy AI | Source Code

Next.js | OpenRouter

- Developed an AI-powered resume parsing system extracting structured candidate data from PDFs using **LLM APIs**
- Implemented semantic skill matching to map resumes against **50+ job roles**, improving recruiter screening efficiency
- Built a responsive **Next.js dashboard** visualizing candidate skill gaps and compatibility scoring

Chatbot Plugin | Source Code

Next.js | Shopify CLI

- Developed an embeddable AI chatbot widget designed for third-party e-commerce websites
- Integrated the widget with **Shopify stores using Theme App Extensions**
- Implemented secure configuration with environment variables and dynamic script injection for storefront deployment

Awards

2nd Place in 4th International Student Innovation Contest (Liaoning Province, 2025)

Nov 2025

- Recognized for developing **Resumy AI**, an **AI-powered resume parsing system** that extracts structured candidate data and maps resumes to **50+ job roles**, evaluated on originality, technical depth, and real-world applicability

3rd Place in Shenyang Student Mobile App Competition (2025)

Sep 2025

- Awarded for developing **Neurofit AI**, a mobile adaptation of an AI-powered fitness recommendation platform, converting the original **web-based system** into a **mobile application** to deliver personalized workouts and real-time AI coaching for improved accessibility and user engagement

Technical Skills

Languages: Typescript, JavaScript, SQL, HTML5, CSS, PHP

Developer Tools: Postman, Vercel, Git, Figma, Cypress

Libraries/Frameworks: Next.js, React.js, Vite, Laravel 12, TailwindCSS, Framer Motion, Zustand, Shopify, Wordpress
