## PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of experience building responsive web applications using modern stack. Passionate about crafting clean interfaces, exploring AI features, and applying coding and design patterns for more dicipline behaviour. Eager to grow in a collaborative environment and contribute to innovative projects, while continuously improving technical skills and problem solving skills.

## EDUCATION

|                                                                                              |                                                |
|----------------------------------------------------------------------------------------------|------------------------------------------------|
| <b>State Polytechnic of Malang, Indonesia</b><br><i>Bachelor of Computer Science</i>         | <i>Aug 2023 — Jul 2027</i><br><i>GPA: 3.82</i> |
| <b>Shenyang Aerospace University, Shenyang, China</b><br><i>Bachelor of Computer Science</i> | <i>Aug 2025 — Jul 2027</i><br><i>GPA: 3.75</i> |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                        |

| <ul style="list-style-type: none"><li>• Developed an AI-powered fitness platform that generates personalized workout, diet, macros, and grocery plans using a unified LLM pipeline, reducing response latency by 40%</li><li>• Improving a scalable backend using Convex with background job processing and caching strategies to prevent client timeouts and ensure reliable real-time data synchronization</li><li>• Designed a modern responsive frontend with Next.js and Tailwind, improving user flow efficiency by 92% through streamlined form-based AI inputs and optimized UX for faster plan generation</li></ul> |                            |
| <b>Anastasya (Florist Storefront &amp; Admin)</b>   Next.js, PostgreSQL, Prisma, Tailwind                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <i>Jan 2026 — Mar 2026</i> |
| <ul style="list-style-type: none"><li>• Developed a florist e-commerce and admin platform, boosting storefront performance (40% faster load), increasing conversion rate by 25%, and cutting product/category/blog management time by 82%</li><li>• Implemented full-stack Next.js (App Router) architecture, achieving 40% faster API response times and supporting 100+ users</li><li>• Built UI/UX features including dynamic product discovery, TanStack-powered data tables, responsive design, and integrated WhatsApp ordering to enhance customer engagement and conversion</li></ul>                                |                            |

**Resumy** | Next.js, OpenRouter (LLM), TypeScript

Nov 2025 — Nov 2025

- Developed an AI-powered resume parsing system that extracts structured candidate data from PDFs using LLM APIs, improving data extraction accuracy and processing speed by 84%
- Implemented semantic skill matching across 50+ job roles, enhancing recruiter screening efficiency by 20%
- Built a responsive Next.js dashboard to visualize candidate skill gaps and compatibility scores

AWARDS & HONORS

**2nd Place in 4th International Student Innovation Contest**

Dec 2025

*Shenyang Aerospace University*  
Recognized for developing Resumy, an AI powered resume parsing system that extracts structured candidate data and maps resumes to 50+ job roles

**3rd Place in Shenyang Student Mobile App Competition**

Oct 2025

*Shenyang Aerospace University*  
Awarded for developing Neurofit, a mobile adaptation of an AI Voice Coaching, converting the original web-based system into a mobile application to deliver personalized workouts and real-time AI coaching

SKILLS

**Programming Languages:** TypeScript, JavaScript, SQL, HTML5, CSS, PHP

**Frameworks & Libraries:** Next.js, React.js, Vite, TailwindCSS, Shopify, WordPress, Prisma, PostgreSQL, TanStack, Motion, GSAP, Convex

**Developer Tools:** Postman, Vercel, Git, Figma, Cypress
