## Education

### State Polytechnic of Malang & Shenyang Aerospace University

Expected Graduation: Jul 2027

Double Degree Program - Bachelor of Computer Science

Indonesia - China

- Current Semester: 7 — **Cumulative GPA: 3.36/4.00**
- Courses: Software Engineering Practice, Applied Machine Learning, Operating Systems

## Work Experience

### Bamboo System Technology

Jun 2026 – Jul 2026

Software Developer Intern

Singapore (Remote)

- Debugged and resolved bugs in the **ATD Flutter application**, improving application stability and building the application into an **Android APK** for deployment
- Implemented **15+ AI-powered features** using **Codex**, reducing development time by **65%** across multiple application modules
- Contributed to tested and debugged **FUREN**, an AI-powered educational platform designed to assist prospective students with university applications

### Purple Box AI

Nov 2025 – Jan 2026

Front-end Developer Intern

Rome, Italy (Remote)

- Developed a **RAG chatbot plugin** embedded into Shopify, WordPress, and WooCommerce, enabling automated website content indexing for AI-powered conversations
- Integrated backend APIs hosted on **Railway** for **RAG-based chatbot** in the **Next.js** plugin and performed end-to-end testing using **Playwright**
- Built **8 responsive business analytics dashboards** with real-time backend integration, collaborating with **20+ individuals** throughout the development

### Anastasya Bouquet

Aug 2025 – Feb 2026

Full-Stack Developer

Malang, Indonesia (Remote)

- Built a full-stack e-commerce platform, developing the responsive storefront and admin dashboard with CMS and product management while leveraging **Codex** to reduce development time by nearly **70%** and increase operational efficiency by **85%**
- Implemented a **WhatsApp-based checkout** and deployed the platform to production, reaching **100+ users across Malang**

## Projects

### Neurofit 2.0 (AI Fitness & Nutrition Planner)

Website | GitHub

- Built an AI-powered fitness platform generating personalized workout, nutrition, and grocery plans through structured AI outputs directly into user profiles
- Developed an **AI coaching agent** with real-time streaming and location-based gym search, alongside an interactive onboarding flow and dashboard for managing AI-generated fitness plans

### Bobby Logistics (WhatsApp CS Automation - Google Vision)

Demo | GitHub

- Built an **WhatsApp logistics automation** for automating customer intent routing, product extraction from screenshots, shipping calculations, and order state management
- Implemented a two-tier AI triage and stateful workflow that reduced unnecessary LLM calls, supported asynchronous customer conversations, validated shipping data, and escalated heavy cargo and payment verification cases to administrators

### TokenGecko (LLM Prompt Inspection Workbench)

Website | GitHub

- Built an LLM prompt inspection platform with a **Monaco editor**, featuring real-time token counting and **multi-provider token and cost benchmarking** across leading LLM models

### Resumy AI (AI Career Matching - LLM & RAG)

Website | GitHub

- Developed an end-to-end **AI career analysis system** using **Next.js**, **Random Forest**, and **Qwen LLMs** for career prediction, skill extraction, and personalized CV analysis

## Awards

---

- 4th International Student Innovation Contest in Liaoning Province

Nov 2025
- **Second Place** among Liaoning university teams for developing **Resumy AI**, an AI-powered resume analysis platform leveraging Large Language Models

## Skills

---

**Programming Languages:** TypeScript, JavaScript, SQL (PostgreSQL, MySQL), HTML5, CSS, PHP

**Frameworks & Libraries:** React.js, Next.js, Vue.js, Laravel, Flutter, Prisma, TanStack Table, Convex, Tailwind CSS

**Developer Tools & Cloud:** Git, GitHub, Postman, Vercel, Supabase, NeonDB, Docker, Clerk, n8n, Playwright

**Spoken Languages:** Indonesian (Native), English (C1 / Fluent), Chinese (Elementary)
